THE ELECTRO PLATE has now been before the public since 1841, and after the most severe test of wear in the vessels of the Royal Mail Steam Packet Company, the Peninsular and Oriental Company, the General Screw Steam Ship Company, the Pacific Steam Navigation Company, and numerous Club Houses, Hotels, and Private Houses, in every part of the world, continues to give the most unqualified satisfaction, supplying as it does all the advantages of Silver in utility and beauty of effect. It will be found that the interest of money upon the cost of Silver Goods for a period of seven years, is alone sufficient to purchase Electro Plate; this, with the now established fact of its extreme durability, makes it a matter of great importance to all purchasers of such articles.

The Patentees refer with confidence to the above facts and to the rapidly increasing demand for their goods, as proved by every successive year's experience; also with great satisfaction to the award made by the Royal Commission of the GREAT EXHIBITION, 1851, OF THE FIRST CLASS OR COUNCIL MEDAL for these productions, and the Grand Gold Medal of Honor (the only one accorded to the Trade) together with the decoration of the Legion of Honor at the Great Exhibition in Paris, 1855; and they now renew their assurances, that no exertion or expense shall be spared on their part to continue to produce articles of such quality only as will insure to them the very high and distinguished patronage which they have hitherto received.

All articles manufactured by the Patentees are marked "E. & Co." under a

crown, thus— and such only are warranted by them.

The Patentees feel it necessary particularly to call the attention of purchasers to the above marks; as it must be evident that the wear of all articles depends upon the thickness of the deposit, whether of Gold or Silver, consequently the mere fact of being "*Electro-plated or Gilt by Elkington's Patent Process*," is no guarantee for the durability of the article or for E. & Co.'s manufacture, unless their patent marks, *as above*, be distinctly visible on each piece. Nearly all manufacturers of Plate now use the Electro process, therefore it is highly important that buyers should satisfy themselves as to the quality of the goods they are purchasing.

E., M., & Co. execute any of the designs in this book in SILVER.
